BAJRANG CHIKINE

Ph No: **+91 86399 72040** | E-mail: **bajrang2411995@gmail.com** | **PL-300**, **DP-600 Certified**

Objective:

Growth-oriented IT professional with **7.3** years of experience as a **Power BI developer** and **1** year in **Microsoft Fabric**. Seeking a challenging role in business visualization to leverage my technical, analytical, and problem-solving skills for organizational success.

Professional Summary:

- Worked in multiple projects using **Power BI**, **Fabric, SQL Server, Snowflake** and **MS Excel**.
- Prepare **Daily, Weekly**, and **Monthly s Quarterly** Reports by coordinating the information from various applications to distribute accurate Reports within prescribed deadlines.
- Experience in connecting with multiple data sources such as **Fabric Lakehouse, Warehouse, SQL Server** and **Excel** with Power BI to build visuals.
- Worked on performing the **ETL** activities in **Microsoft Fabric Dataflow Gen2**, and **Power Query**.
- Experience in doing **Data Modelling** in **Power Pivot**.
- Good experience at creating different visualizations using default charts and custom charts based on business requirements using **Power BI desktop**.
- Proactively explored and gained hands-on experience with **Microsoft Fabric** by attending boot camps and building end-to-end analytics solutions using **Lakehouse, Dataflows Gen2, Pipelines**, and **One Lake** for data ingestion, transformation, and reporting, integrated with **Power BI** for executive dashboards.
- Worked on enhancing the Data Model by creating **new columns, new measure** and new tables using **DAX** (Aggregation, Date and Time, Filter, Financial and etc.)
- Creating **Row level security** in **Power BI Desktop** and integration with **Power BI Service** Portal and Gateway services and handling user and app security.
- Good experience in publishing the Reports to **Power BI Service** and setting up the necessary connections.
- Good experience in Creating the **Dashboards** using Multiple Reports.
- Worked on **On-Premise data Gateway** to refresh and schedule refresh the data in the dataset.
- Good experience in sharing the reports and dashboards with end users.
- Hands on experience on Implementing **Bookmarks, Parameters**.
- Strong ability to work independently or as a member of a team. Willingness to learn new concepts and technologies.

Technical Skillset

- Power BI Desktop
- Power BI Service
- SQL Server
- Fabric
- Snowflake

Core Competences

- Stakeholder Management
- Project Management
- Power BI Development
- Software Development Lifecycle
- Process Improvement
- Business Intelligence

Experience Summary:

- Working as **Senior Software Engineer** in **Yash Technologies** from Sep 2022 to till date.
- Worked as **Software Engineer** in **Experis IT from** Jun 2021 to Sep 2022.
- Worked as **Engineer** in **DesignTech Systems from** Feb 2018 to Dec 2020.

Education:

- Completed **Bachelor of Technology (B. Tech)** from JNTUH in 2017.

Certification:

- **Certified PL-300** / **Power BI Data Analyst Associate** & **DP-600** / **Fabric Analytics Engineer Associate** demonstrating proficiency in data analysis and visualization using Microsoft Power BI & Microsoft Fabric.

Project Summary:

Project 1:

- **Project Name** : DCDL - RI Rebuild
- **Client** : Caterpillar Inc, USA
- **Technology/Tools** : Power BI Desktop, Power BI Service, Snowflake, Fabric, Azure Devops
- **Role** : Sr Software Engineer
- **Project Duration** : Jun 2023 to Present
- **Team Size** : 7

Brief Description of Project:

Caterpillar Inc is an American construction equipment manufacturer company head quartered in USA. It is a Fortune 100 corporation which designs, develops, engineers, manufactures, markets, and sells machinery, engines, financial products, and insurance to customers via a worldwide dealer network.

Worked with the US team under the Resources Industry Unit to design, develop, and optimize Power BI dashboards, enabling leadership to monitor KPIs and track business performance across global regions. Developed reports to compare current year performance vs. targets and benchmark against the last three years, providing actionable insights for strategic decision-making. The Data source used for Power BI is Snowflake.

Responsibilities:

- Designed and delivered interactive Power BI dashboards (Scorecards, SA Leadership, GTM) for global regions (Americas, APD, EAME), enabling leadership teams to track performance KPIs and business targets.
- Performed advanced data preparation and transformation using Power Query, creating reusable tables and logic to meet diverse reporting needs.
- Developed and optimized data models with accurate relationships, cardinality, and filter directions to ensure scalability, accuracy, and report performance.
- Built dynamic DAX measures and functionalities to deliver client-specific insights and enhance the report.
- Created KPI-driven reports for the resource industry, comparing current year performance against targets and historical data (last 3 years) to drive data-backed decision making.
- Collaborated with client and ETL teams to support defect resolution, enhancements, and seamless migration of objects across Dev, PreProd, and Production environments

Project 2:

- **Project Name** : Invoice to Pay - Phase 1
- **Client** : Caterpillar Inc, USA
- **Technology/Tools** : Power BI Desktop, Power BI Service, Snowflake.
- **Role** : Software Engineer
- **Project Duration** : March 2023 to June 2023
- **Team Size** : 6

Brief Description of Project:

Caterpillar Inc is an American construction equipment manufacturer company head quartered in USA. It is a Fortune 100 corporation which designs, develops, engineers, manufactures, markets, and sells machinery, engines, financial products, and insurance to customers via a worldwide dealer network.

Worked with the US team under the Resources Industry Unit to design, develop, and optimize Power BI dashboards, enabling leadership to monitor KPIs and track business performance across global regions. The project mainly involves in developing reports in Power BI in order to track the invoices providing actionable insights for strategic decision-making. The Data source used for Power BI is Snowflake.

Responsibilities:

- Designed and delivered interactive Power BI dashboards (ITP KPI Summary and ITP KPI Detail reports) for worldwide dealer network enabling leadership teams to track business targets.
- Built and optimized data models, relationships, and DAX measures to ensure accuracy, scalability, and improved report performance.
- Performed advanced data preparation and transformation using Power Query, creating reusable tables and logic to meet diverse reporting needs.
- Built dynamic DAX measures and functionalities to deliver client-specific insights and enhance the report.
- Responsible for enhancements & Developments using Power BI Desktop and Published reports to Power BI Service workspaces, data refresh schedules, and user access.
- Handled production report support, including defect resolution, performance tuning, and troubleshooting refresh failures.
- Supported deployments across Dev, UAT, and Prod environments, ensuring smooth transitions and managed Power BI App deployments and workspace governance for secure and efficient report distribution.
