OBJECTIVE

To find a stimulating and challenging position which builds on my technical skills & knowledge, as well as professional experience, and then utilize it to work towards the growth of the organization and at the same time should provide me job satisfaction.

PROFESSIONAL SUMMARY

A customer oriented, multitask professional with excellent analytical and logical skills possesses experience as Report Developer having **5+ years of experience in Power BI and 2+ years of experience in Fabric.**

- In my carrier used tools like **Power BI, Excel, and SQL Server, Fabric.**
- Working on various **Business Specification, Technical Specification and Change Requests.** Worked on Data Validation and **Unit Testing.**
- Conducted meetings with business stakeholders, clients for requirement gatherings and presented various solutions using best practices.
- Created many Reports, Dashboards using multiple reporting concepts and options.
- Connecting data sources, importing data, transforming data, and creating relationships between tables in Power BI as per user.
- Sound knowledge in making DAX queries in Power BI desktop and DAX studio.
- Created many DAX measures, calculated columns to implement date, time, statistical, and mathematical operations to show on the visuals.
- Implemented the projects in **Agile Methodology**
- Experience in reporting services, Power BI (Dashboard Reports) using MS SQL Server.
- Expertise in Creating Data Visualizations like **KPI**, **Matrix table**, **Area Charts**, **Line** and **Stacked column chart** and Creating Visuals like **Donut chart**, **Waterfall chart**, **Gauge chart** and **Funnel chart**.
- Created reports with **Parameters**, **Bookmarks**, **Synchronize Slicers**, **Drill down** and **Drill through** options.
- Knowledge in writing the Joins, Views, Stored Procedures, Sub Queries and Temp Tables. Performed Data Validation and Unit Testing.
- Knowledge in Data Gateway for Data Refreshing and Scheduling by using **Power BI Cloud Service**
- Created Fabric Workspace in recent times.
- Implemented **Row-Level Security and Dynamic RLS** as part of security in Power BI.

- Experience in **VLOOKUP** formula development, Pivot Table, and Pivot table reporting.
- Knowledge of **ADF** pipelines.
- Knowledge of **Power APPS** to embed Power BI Report and Create Apps.
- Fabric Lake house and Fabric Warehouse
- Loading data from Fabric LH to Fabric WH through stored Procedures
- Views creation in Fabric WH
- Fabric Dataflow gen 2
- Running Fabric Pipelines

CERTIFICATIONS

- **Certification**: Completed **PL- 300** and **DP-600** certifications.

TECHNICAL SKILLS

- **BI Tools**: Power BI, Report Builder, Excel Pivoting, ADF
- **OS**: Windows Family
- **Databases**: MS SQL Server
- **Client Tools**: SSDT, SSMS, DAX Studio
- **Languages**: SQL, DAX, Mashup

ACADEMIC PROFILE

- ▪ Education: B. Tech from JNTUH affiliated college.

PROFESSIONAL EXPEREINCE

- I have been working as BI Developer with **VNB Consulting Services Pvt LTD**, Bengaluru since Nov 2022 to till date.
- I worked as Associate Data Visualization Technologist with **Blue Orbit Solutions Pvt Ltd**, Chennai from Oct 2021 to Oct 2022.
- Worked as a software engineer with **Vesture Soft Tech PVT LTD ,** Hyd from May 2020 to sep 2021

PROJECTS

Project 1:

Client	**: Doble**
Project Name	**: Future State Implementation -Finance**
Application Name	**: Finance App**
Role	**: Fabric Developer**
Team Size	: 6
Environment	: Power BI, SQL Server, DAX, Excel, Fabric WH, Fabric LH,Dataflows

Project Description:
Doble is a company that does business with BC; they don't have complete WH, they use a lot of manual file data, and their reports are in Excel. The requirement is they need interactive reports with complete WH;
Their reports now refresh every day so they can use reports easily to track their business needs. We stored their BC data in the Fabric Lake house and then in the Fabric Warehouse through stored procedures and created pipelines to run stored procedures. created views according to their data requirements.
Stored their manual files and one stream of data in Fabric Data Flow, and from Fabric Data Flow to Fabric Lake house, Lake house to Warehouse through stored procedures.
Created Power BI reports with Power BI data set live connections and scheduled refresh for models, pipelines, and data flow.

Responsibilities:

- Export data from Business Central to Fabric LH
- Enable triggers in Business Central and Validate data from Fabric LH to BC
- Load data from Share point to Fabric Data flow and transformations in tables
- Stored Procedures to load data from Fabric LH to Fabric WH
- Running of Notebooks and Pipelines
- Analyzing Excel reports and gathering KPIs and formulas which are needed in Power BI
- Loading tables from Fabric WH to Power BI and implement semantic model with Power query operations, calculated columns and measures.
- Creating Power BI reports with live connection
- Publishing Power BI reports to Power Bi service
- Scheduling refreshes for Semantic models
- Data validation in reports
- Deploying models and reports from QA to UAT and UAT to Prod
- Test cases creation
- User guide creation
- Mapping sheets creation

Project 2:

Client	:	UCLA Health, USA
Project Name	:	RCM
Application Name	:	Admissions Reports
Role	:	Report Developer
Team Size	:	6
Environment	:	Power BI, SQL Server, DAX, Excel

Project Description:

UCLA is an American health care company. UCLA offers individualized treatment plans for a full spectrum of women's health care needs from general gynecology care to a full range of family planning services. The scope of this project is to generate Patient Demographics, Appointment Summary, Encounter Summary, Patient Details Screen,Operation Metrics reports.

We are working with OBGYN patients' data for healthcare organizations that has several patients for different services. Dynamically drill into your organization data and reveal instant insights to drive decision making and resource allocation. They need to show decision making across years, services, and in various locations by creating various customized and interactive Reports and Dashboards in Power BI. The strategic, tactic and predictive analytical system expecting appropriate customized and interactive Reports and Dashboards in Power BI.

Responsibilities:

- Collecting and Understanding the Business Requirement Documents and building the relationships Collecting between the various data sets in power pivot.
- Performed structural and data changes suitable for better modeling and visualizations.
- The results were converted into various visualizations like Donut chart, Pie chart, Bar graph, Waterfall charts and Card Visualizations.
- Created different filters like visual level filters, page level filters and report level filters as per reporting needs.
- Created bookmarks, drill-down, drill through and parameters based on customer requirement.
- Created many DAX measures, calculated columns to implement date, time, statistical, and mathematical operations to show on the visuals.
- Specified users to access reports at data-set Row Level Security (RLS).
- Publishing reports to Power BI server and providing the access to required team lead.
- Specified Scheduled Refresh for the report based on customer instructions.
- Generated alerts when customer required point reached.
- Created App spaces for easy visualization of the reports as per the client requirement.
- Performed Data Validation and Unit Testing of Reports.

Project 3 :

Client	:	UCLA Health, USA
Project Name	:	RCM
Application Name	:	Clinical Reports
Role	:	Report Developer
Team Size	:	6

Environment : Power BI, SQL Server, DAX, Excel

Project Description:

UCLA is an American health care company. UCLA offers individualized treatment plans for a full spectrum of women's health care needs from general gynecology care to a full range of family planning services. The scope of this project is to generate Clinical Outcomes, Labor and Delivery, Delivery Statistics. We are working with OBGYN labour and delivery data for healthcare organizations that have several patients by delivery modes. Dynamically drill into your organization data and reveal instant insights to drive decision making and resource allocation. They need to show decision making across years, through services, and in various locations by creating various customized and interactive Reports and Dashboards in Power BI.

Responsibilities:

- Understanding the business decisions and collecting the related business documents given in Share Point Server.
- Created reports with various visualizations required and implementing business logic s.
- Used a n a l y t i c s protocols and Time Intelligence Functions [Last Year, Two years back, Actives Year over year growth, YoY growth percentage etc.]
- Implemented drill down and bookmarking options and parameters wherever required.
- Constructing or ensuring appropriate Data Model before report development.
- Created calculated columns and measures using DAX based on business need.
- Working on data preparation by converting, changing data formats, and eliminating duplicate.
- Created custom functions and used in multiple places of reports.
- Worked on On-Premises Gateway to refresh the data sources or create a live connection with Tabular SSAS.
- Created dashboard and content pack usages.
- We answered for the customers' reviews and notifications.

Project 4 :

Client : UCLA Health, USA

Project Name : RCM

Application Name : Financial Reports

Role : Report Developer

Team Size : 6

Environment : Power BI, SQL Server, Excel

Project Description:

UCLA is an American health care company. UCLA offers individualized treatment plans for a full spectrum of women's health care needs from general gynecology care to a full range of family planning services. The scope of this project is to generate Claims, Revenue and Expense reports for all the Patients.

Responsibilities:

- Used various sources to pull data into Power BI such as SQL Server and Excel.
- Wrote calculated columns, Measures queries in Power BI desktop to show good data analysis techniques.
- Weekly presentation to the business users about the reports and their changes as required.
- Worked on all kind of reports such as Yearly, Quarterly, Monthly, and Daily.
- Worked on all types of transformations that are available in Power BI query editor.
- Extensively used Joins and Sub-Queries to simplify complex queries involving multiple tables.
- Worked on Tables, Stored Procedures, Views, Indexes, and User Defined Functions, performed data validation and unit testing using SQL.
- Scheduled Automatic refresh and scheduling refresh in Power BI service.
- Created Workspace and content packs for business users to view the developed reports.
- Installed and configured Enterprise Gateway and Personal gateway in Power BI Service.
- Generated the Reports Weekly and Monthly wise as per the Client Requirements.
- Rendering the Reports in the form of PDF, EXCEL, and CSV.

DECLARATION

I hereby declare that the above particulars of facts and information stated are true, correct, and complete to the best of my belief and knowledge.
